Easy to install with Air release adhesive

Our stretchable architectural film
 is applied using an Acryil type adhesive, which has an adhesive surface with grid grooves for air-release between the film and the substrate.
The air is released along these grooves, enabling the film to be quickly and easily affixed to large or complex surfaces.
This provides a higher quality finish.

Facilitates the release of air when the film is affixed, enabling easy application to large or complex surfaces.

Wood

Inspired by a number of timber species, our Wood range reveals the charm of your rooms, giving them a natural touch. Are you dreaming of an interior with a "Swiss chalet" or Canadian-style look? An oak, beech, teak look....Placed in strategic places, such as a table or a wardrobe door, you would only need the smell of the woods and birdsong to transport you to the middle of the forest.
